

## Improving Compliance with Documentation and Counseling Guidelines during Induced Labor

<b>PROBLEM</b> : In October 2011, 97% of induced labor files were not in compliance with Obs/Gynae Dept guidelines on documentation and patient counseling. From January through April, after initial intervention, 78% of files remained non-compliant.		<ul> <li>TEAM:</li> <li>•CCITP Members: Dr. Nadia Al Mulla, Dr.</li> <li>Hisham Abdulrahman, Dr. Eman Kutob</li> <li>•Dr. Nuda Al Nagi</li> <li>•Marshall Nannes</li> <li>•Med. Records Staff: Ria Alma Malagad,</li> <li>Meena Sidarthan, Raymond Merida,</li> </ul>
in 65% of induction of Edbor cases by the cha of suite 2012		
<ul> <li>INTERVENTION:</li> <li>Nov 2011: Created summarized version</li> <li>Jan – Apr 2012: Educate MDs, nurses at</li> <li>May 2012: Introduce "hard stop" in IOL without both clear documentation of patients</li> </ul>	pout patient counseling and IOL guideline process, preventing induction of labor	Paquito Maloloyon • Sr. Fatima, Induction Ward <b>COACH:</b> Dr. Shwetha Akshaya <b>PROJECT SPONSOR:</b> Dr. Halima Al Tamimi
RESULTS: Compliance with Guidelines, as Results 90% 60al: 85% 70% 70% Second Intervention: 60% Initial Intervention: 40% Guideline 30% 0%	Second Intervention 15% 5%	<ul> <li>CONCLUSIONS:</li> <li>Significant improvement in compliance after education of MDs and nurses and ntroduction of process change</li> <li>Major increase in guideline compliance even n areas beyond documentation/counseling</li> <li>Patient Counseling did not happen without mandatory requirement</li> <li>Long, unclear guidelines needed to be simplified to be useful</li> <li>NEXT STEPS:</li> <li>Engage with non-compliant physicians to earn reasons for resistance</li> <li>Target IOL decision-making to reduce number of inductions</li> </ul>
