

## PATIENT DIRECTED VISITATION

---

Visit if you are sick (or someone at home is) Disturb your patient if he/she is resting

### **Please do:**

Upon arrival, check-in with the ground floor security, who will check your photo ID and confirm with the respective floor staff.

Cooperate with the security that will enter your name the visitor's log and direct you to the respective unit.

Ask the nurse how to wear mask or other personal protective equipment's as required.

Wash hands/ use the hand rub when entering/ leaving unit

### **Help by:**

Checking at the nurses' station to know if any precautions are to be taken due to your patient's condition or care needs.

Wearing mask, gown or gloves as required, and as instructed by the nurse.

Avoid overcrowding the patient care area by ensuring only 2 members are inside the patients room at a time and not more than 30 minutes.

## PATIENT DIRECTED VISITATION

---

### What is Patient Directed Visitation?

Patient directed visitation has been implemented to enhance your experience in Communicable Disease Center.

No Restrictions to visiting

We do not impose any restrictions on visitation timings or number of visitors. However, in order to avoid overcrowding in patient care areas and to minimize exposure we encourage only 2 visitors at the same time for not more than 30 minutes.

The power is on you!

### What does it actually mean?

It means that during your stay at this facility, you are the one to decide who should be allowed to visit you, at what time they should be allowed to visit you.

Our health care team would be coordinating with you and help you plan your visitation arrangement to make your stay more pleasant.

### Why we liberalized visiting practice

Because we understand!

We embarked this new journey, because we believe that the presence of loved ones will assist in early recovery and healing.

Above all, we understand that honoring patients

and families wishes to be together is the best compas-

sionate thing to do!

### Overnight Staying?

Is your family members or care givers interested to stay at your side for the night? If so, communicate your wish to our healthcare team.

Arrangements for overnight staying can be arranged based on your health condition.

What if my illness doesn't allow visitors to come?

Well, sometimes it might be advisable to restrict visitors due to your illness. If so, those restrictions are in place only to protect you and your loved ones from getting sick:

If any such clinically based restrictions are in place, it would be communicated to you and your family.

In such events, your loved ones are encouraged to get updates about your recovery from our dedicated health care team members.

### GUIDE for Visitors

**Please don't:**
